HDPT Transit ITS Update

- July 2017 HDPT went live with new Intelligent Transportation System (ITS)

  - Cost of system was about one million dollars over the course of five years and includes:

    - GPS on all transit buses

    - Automated Announcements for passengers

    - Automatic Passenger Counters

    - Mobile Data Terminal with route information for the operator

    - Back-end reporting for management

    - Mobile application for passengers

  - System enables passengers to:

    - See where buses are instantly on a map

    - Plan a trip using transit

    - Set arrival alerts

    - View service messages

    - Provide feedback about the system

  - System enables HDPT to:

    - Monitor schedule adherence of routes and make changes as necessary

    - View ridership in several ways, including by bus stop

    - Send out service alerts and/or changes in service instantly to the public
