Gender

Female

What is your age?

18-30 years old

Are you reapplying for a current position you hold? *

No

Which Boards would you like to apply for?

Environmental Performance Standards Committee (EPSAC): Eligible

Interests & Experiences

Please tell us about yourself and why you want to serve.

Why are you interested in serving on a board or commission?

I am interested in serving on this board to make a positive impact on the future of my community and to better support the students at James Madison University through my work. I also hope to strengthen my knowledge and skills by engaging in thoughtful discussions with individuals from diverse backgrounds and disciplines. Most importantly, I want to contribute to a collaborative group dedicated to creating a more sustainable and ecologically resilient city.

What other interests or concerns do you have regarding the community?

My primary interest within the community is transforming more areas into native green spaces. With an educational background in Ecology and my current role at James Madison University, I have gained valuable experience in designing and maintaining pollinator-friendly habitats. Creating spaces that provide food and shelter for local pollinators is essential in a city that continues to grow and urbanize. I am passionate about fostering a balance where community and nature can coexist harmoniously, and I would greatly value an opportunity to contribute my efforts toward that goal. Another area of interest for me is improving waste and water management within our city. Through my work on JMU's grounds, I have observed firsthand the impacts of flooding and runoff after major storms. I believe it is critical to focus on implementing environmentally sound infrastructure—such as porous pavement and bioswales near storm drains—to help manage runoff and protect local waterways. Advocating for these types of sustainable solutions is something I am eager to advance within the community.

What relevant experience or education do you have to this board or commission?

I graduated from James Madison University in 2020 with a degree in Biology and a focus in Ecology. In 2024 I served on the Appalachian Conservation corps and worked on numerous conservation projects within the George Washington National Forest and The Shenandoah National Park. Some of the projects included habitat degradation prevention, erosion control, invasive species management, and historical building restoration. Currently, I am a Lead Zone Environmentalist on JMU's campus. My responsibilities include sustainable landscape design, shrub and tree health monitoring for our campus tree initiative, and propagating as well as managing our greenhouse.

Please list any past or present community involvement e.g. City Council, Boards and Commissions, Citizen Academy, etc. in Harrisonburg or elsewhere:

I served on the Appalachian Conservation Corps and am currently in the process of receiving my Master Gardener's certification through the Virginia Extension Cooperative.
