

A Qualified Census Tract (QCT) is an area designated by the Secretary of HUD where, for the most recent year for which census data are available on household income in such tract, either 50 percent or more of the households in the tract have an income which is less than 60 percent of the area median gross income or the tract's poverty rate is at least 25 percent. HUD uses American Community Survey (ACS) data on household income to designate QCTs.

Qualified Census Tracts
