He stated that was presented as one of the potential problems that could arise from global change, it is a crisis and problem because the people who are forced to migrate have lost their homes. He hopes if we are fortunate enough to have some come to our city, they are people who will be our wealth to help us make a better world. He brought up the point if applicants must appear in front of Planning Commission when their requests are being presented. He stated it was stated that it was not mandatory, as who you are or how people perceive you should not impact a land use decision. He stated the golf course issue is an unknown of the unknown, he shared his idea on how to decommission a golf course. He stated it is growing season, the city could repeal the tall grass and weeds ordinance.

Anton Blann, aka Vass Castle, stated he is an advocate of many problems in the city and he is very thankful of what he heard this evening. He stated if the city wants houses for the poor community there is a neighborhood behind Roses, but single-family units are too expensive, wouldn't it be better to build studio apartments for the poor which can help to benefit taxes. He stated he has been talking about case working skills and they are in motion, he is now asking if there can be skill building skills for the community, that will help individuals with self-efficient skills. He stated there are many lacking identifications who need help to get it. He stated he feels Strength in Peers should get more education on mental health issues. He stated counseling develops a balanced mind and a balanced heart. He stated as services begin to arise, he will bring people to take advantage of the services so they can get out of the situation they are in. He stated he is very thankful that the city is beginning to think more about the community as a whole and Council's goals will not take years to accomplish.

Wayne Wenger, 641 Broadview Drive, stated the city's name should be changed to Dodge City for the following reasons: city streets are full of man hole covers that are too high, causing damage to vehicles; glow fiber has been digging holes, damaging the streets, and not repairing, someone needs to make sure they are putting the streets back to original condition; can there be a central location where the trash trucks can squeeze the trash juice out instead of leaking it throughout the city, creating sanitary issues; and can we stop people from begging on the street corners, perhaps we can do as other locations are doing and put them to work to pick up debris on side of road, paint houses, etc.

#### **9.b. City Council and Staff**

Vice Mayor Romero stated there are a lot of great things happening in the city, but he doesn't always see everything that is going on and asked the city manager if there could be a weekly bulletin of events generated to help keep track of things. He stated the new evaluation process involves a review committee that will score each application based on a uniform set of evaluation criteria and the committee will make recommendation requests to the city manager. He stated he will review those recommendations and determine which will be included in the proposed budget based on the feasibility of the financial constraints the city has. He stated the review committee consists of the deputy city manager, assistant to the city manager, the Community Development Block Grant coordinator and Revlon Hill, executive director of the Community Foundation. He stated staff is in receipt of 39 applications and the funding total is over \$1M.
