Submitted Proffers

*Submitted conceptual site layout is not proffered.

1. The site shall contain no more than three hundred seventy-eight (378) bedrooms.
2. The site shall contain residential and non-residential uses.
3. A minimum of 8,000 sq. ft. of space for uses permitted by Section 10-3-55.4 (4) shall be contained on the site and limited to the first ground floor of the building(s).
4. No parking lot (including travel lanes and drive aisles) shall be located between Reservoir Street and the closest building to Reservoir Street.
5. There shall be a 100-ft building setback from shared property line with Woodland Subdivision.
6. There shall be an opaque fence at least 4 ft. in height between development areas of the site and the Woodland Subdivision.

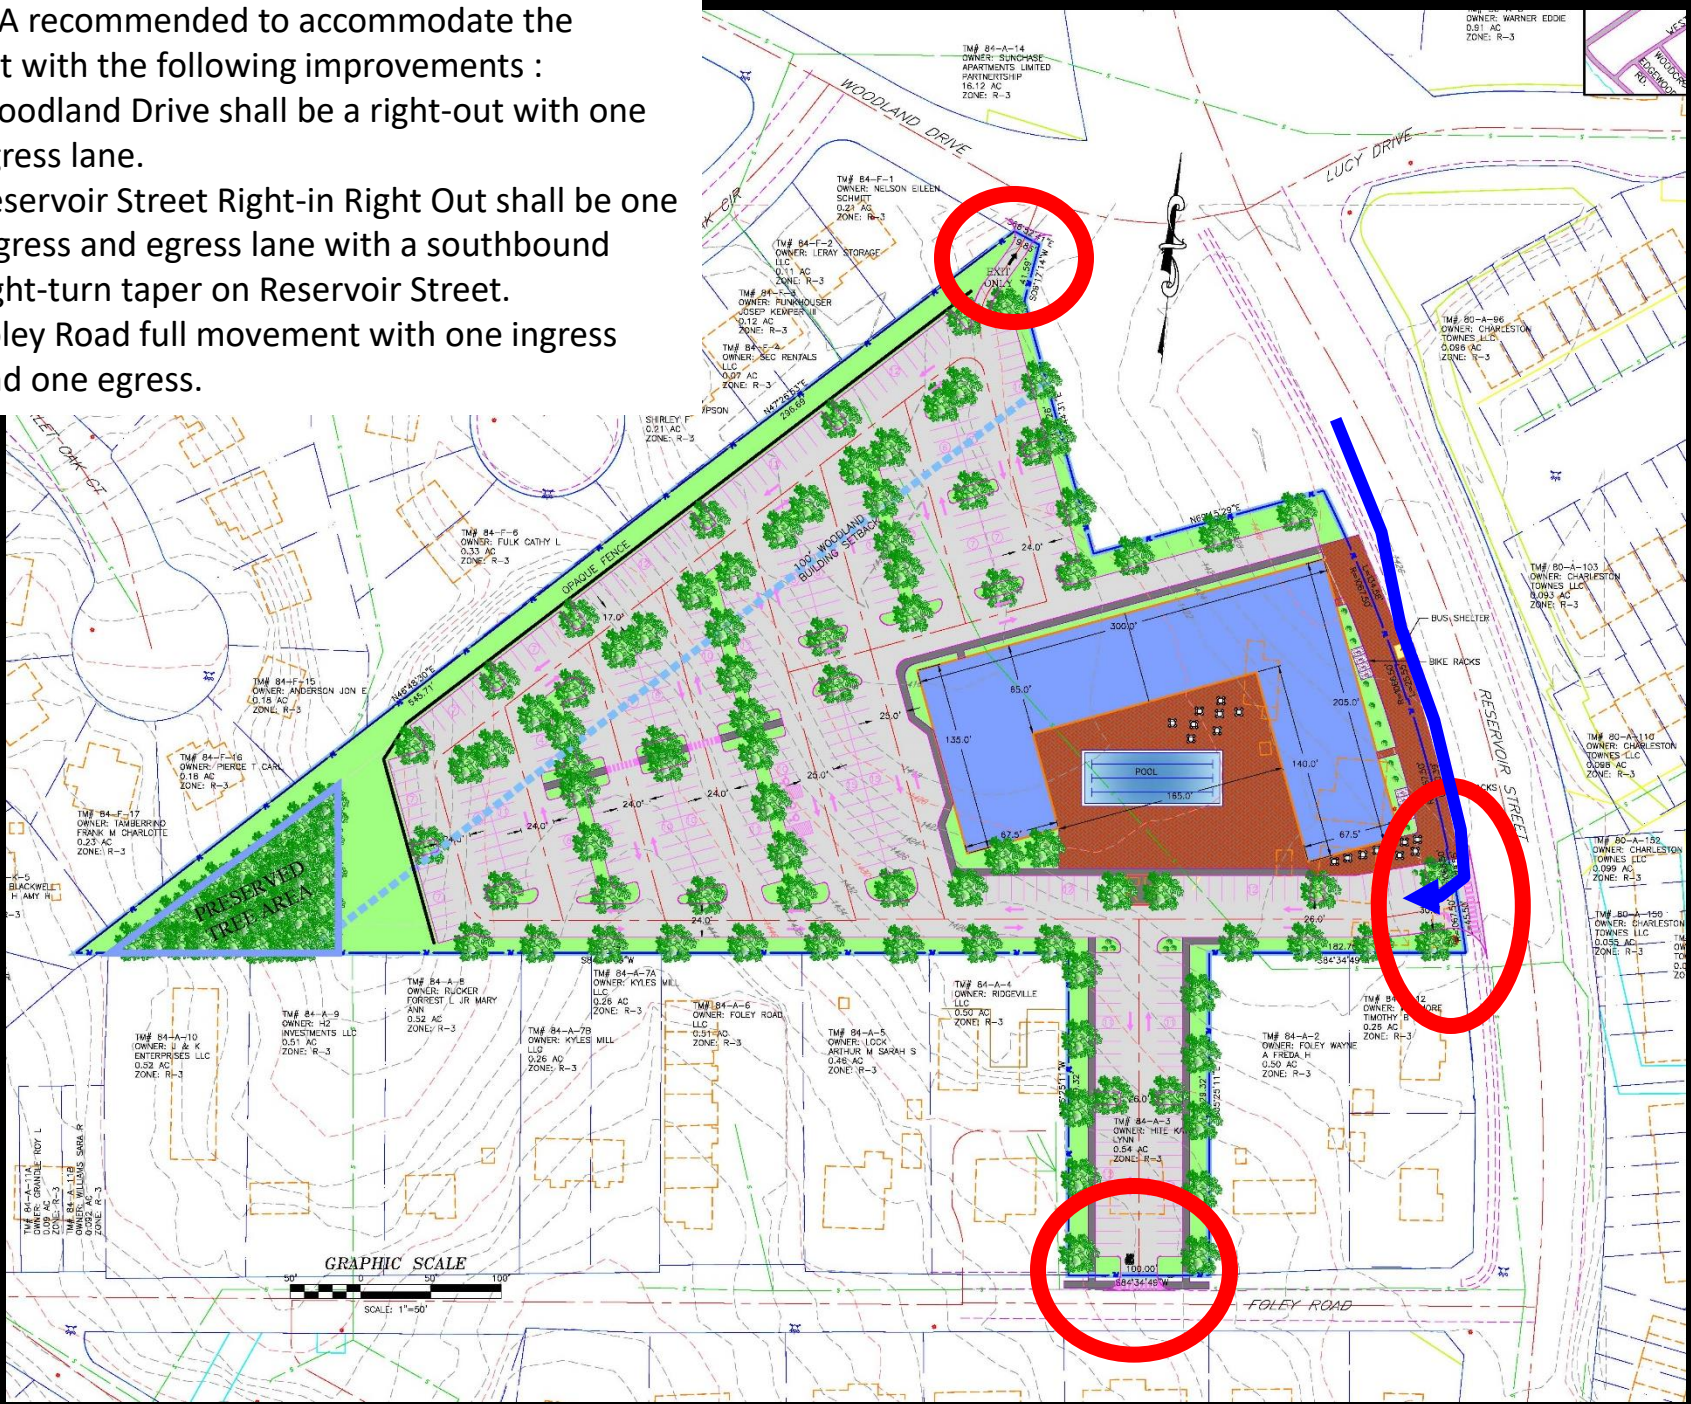

Submitted Proffers

7. The existing vegetation (trees & shrubbery) on the western end of the property bounded by the edge of the current HEC easement, current Harrisonburg sewer easement, and the southern property shared with TM# 84-(A)-9, 10, and 11 shall be undisturbed to provide a vegetated buffer, or an evergreen vegetative buffer shall be created within this area, where such evergreens shall be planted at no less than 5 feet on center and 6 feet in height at the time of planting to fill in and reestablish a vegetative buffer within the bounded area.

The TIA recommended to accommodate the project with the following improvements :

- Woodland Drive shall be a right-out with one egress lane.
- Reservoir Street Right-in Right Out shall be one ingress and egress lane with a southbound right-turn taper on Reservoir Street.
- Foley Road full movement with one ingress and one egress.

Section 10-3-55.6 (e)

Multiple-family development SUPs may be approved if the following conditions as determined by City Council are met:

- 1) Existing multiple-family development, or land planned for multiple-family development according to the Land Use Guide in the Comprehensive Plan, is located adjacent to, across the street from, or in close proximity to the proposed multiple-family development.
- 2) The applicant has demonstrated that adequate vehicular, transit, pedestrian and bicycle facilities:
 - Currently serve the site; or
 - Are planned to serve the site according to a city or state plan with reasonable expectation of construction within the timeframe of the need created by the development; or
 - Will be provided by the applicant at the time of development; or
 - Are not needed because of the circumstances of the proposal.
- 3) The applicant has demonstrated that the proposed multiple-family development's design is compatible with adjacent existing and planned single-family, duplex and townhouse development. Compatibility may be achieved through architectural design, site planning, landscaping and/or other measures that ensure that views from adjacent single-family, duplex and townhouse development and public streets are not dominated by large buildings, mechanical/electrical and utility equipment, service/refuse functions and parking lots or garages.
- 4) The applicant has shown that the site is environmentally suitable for multiple-family development. There shall be adequate area within the site, or the development shall be designed, to accommodate buildings, roads and parking areas with minimal impact on steep

Recommendation

Staff recommended approval of all four requests and specifically recommended a condition be attached to the SUP Per Section 10-3-55.4 (4) to include:

- Standalone, non-residential buildings are prohibited.

Planning Commission's recommendations are as shown below:
