Property Owner

Section 5: Required Attachments to be provided by Applicant

- Site or Property Map
- Letter explaining Proposed Use & Reasons for Seeking a Special Use Permit
- Traffic Impact Analysis (TIA) Determination Form OR Traffic Impact Analysis (TIA) Acceptance Letter signed by Public Works Department - Applicant is responsible for coordinating with Public Works Department prior to submitting SUP application. More information at www.harrisonburgva.gov/traffic-impact-analysis. This requirement is waived for the following SUPs: major family day homes, reducing required parking areas, reduction in required side yard setback, wireless telecommunication facilities, walls and fences, and short term rentals. To prevent delays in reviewing your application, please consult with Planning staff to confirm your application does not require a TIA Determination Form or TIA Acceptance Letter.

NOTE: If applying for a Wireless Telecommunications Facility allowed only by SUP, then also submit a wireless telecommunications facility application.

Special Use Permit

This letter is accompanying the attached special use permit application and is describing the proposed use and reason for seeking a special use permit.

The property listed above is currently under contract for purchase and the desired use is a professional office space. The property is currently zoned M-1 general industrial district and office space is only permitted in conjunction with an approved use. The zoning ordinance section 10-3-97 item (3) allows the use of Business and professional offices with the approval of a special use permit.

Our business operation includes engineering consulting services. We design HVAC, plumbing, and electrical systems. We produce permit and bid drawings using CAD software. Most of our client interaction occurs over email and through conference calls. We occasionally have client meetings at our office and have minimal traffic in and out of our office.

A special use permit is being applied for to meet the requirements listed in the zoning ordinance. The property is also being purchased with a loan and the lender will not allow release of the loan without the issuance of the special use permit.

Peak Hour Trip Generation by Land Use

Row	ITE Land Use		ITE Land Use Code	Unit	Quantity	AM Peak Hour of Adjacent Street Traffic	PM Peak Hour of Adjacent Street Traffic
1	Proposed #1	Single Tenant Office Building	715	1000 SF	5.17	9	9
2	Proposed #2						
3	Proposed #3						
4	Proposed #4						
5	Proposed #5						
6	Proposed #6						
7	Total New Trips						
8	Existing #1	Manufacturing	140	1000 SF	5.17	4	4
9	Existing #2						
10	Existing #3						
11	Existing #4						
12	Existing #5						
13	Existing #6						
14	Total Existing Trips					4	4
15	Final Total (Total New – Total Existing)					5	5

Instructions

Determination of trip generation rates shall be in conformance with ITE guidelines.

1. Based on the intended use(s), calculate the AM Peak and PM Peak trip generation using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 1-6). Attach additional sheets as necessary for more uses.
2. Sum up all of the trips generated for the new uses in the Total New Trips row (row 7).
3. If the development has any existing uses, calculate the AM Peak and PM Peak trip generations using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 8-13). Attach additional sheets as necessary for more uses.
4. Sum up all of the trips generated for the existing uses in the Total Existing Trips row (row 14).
5. Subtract the total existing trips from the total new trips to get the final total number of trips generated by the development (row 15). Enter these numbers on the first page.
