

## **Proposed Design & Construction Standards Manual Amendments**

### Section 2.6.10

~~Developments with 15 or greater car parking spaces shall provide exterior parking for bicycles at a rate of one bicycle space per 25 car parking spaces, with a minimum of 4 bicycle spaces. Bicycle parking shall be in the form of a suitable bike rack(s), conveniently located, visible and anchored for security. Protection from the elements is encouraged. Rack design and layout shall be as recommended in the document "Bicycle Parking Guidelines" as adopted by the Association of Pedestrian and Bicycle Professionals ([www.apbp.org](http://www.apbp.org)). Rack location and type shall be specified on the project site plan.~~

Plans shall include bicycle parking details to address zoning requirements. Such details shall include the location, design, and spacing of bicycle parking on site.
