Matchbox Realty & Management Services, Inc. (Matchbox) is pursuing a rezoning for the property located at 151 W. Wolfe St., Harrisonburg, VA 22801 from an existing R-3 use to B-1 in order to comply with the City of Harrisonburg's updated Comprehensive Plan (2018) and provide more opportunities for expanded commercial uses at a property located in Harrisonburg's Central Business District.

The applicant has submitted an updated proffer letter attached. The previous proffers submitted via letter on April 2, 2020 are hereby withdrawn.

By expanding the use options available to the property, we feel that we will be able to better serve the community's needs.

In the short term, this property will be used to serve as additional on-site parking for the commercial redevelopment project at 136 W. Elizabeth Street. In order to be used as additional on-site parking for 136 W. Elizabeth, we are also applying for a Special Use Permit for the parcel to be used as a parking lot.

If you there are any additional questions about this requested rezoning change, please contact us at your earliest convenience.

Respectfully,

Matchbox Realty & Management Services, Inc.

April 24, 2020

In connection with the rezoning request for the +/- 9,685 sq. ft. parcel identified as tax map parcel 35-S-7, the following is proffered:

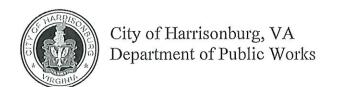

- 1. The applicant would retain all uses permitted by right except for convenience shops, drive-through banks, fast food restaurants, shops that primarily serve coffee, donuts, bread or bagels, and marijuana dispensaries;
- 2. There shall be no less than 10 parking spaces located on the property; and
- 3. Should the lot be redeveloped in the future, no parking lot (including travel lanes and drive aisles) shall be located between W. Wolfe Street and the closest building to W. Wolfe Street.

Special use permits shall be permitted as approved by City Council.

# Instructions

Determination of trip generation rates shall be in conformance with ITE guidelines.

- Based on the intended use(s), calculate the AM Peak and PM Peak trip generation using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 1-6). Attach additional sheets as necessary for more uses.
- Sum up all of the trips generated for the new uses in the Total New Trips row (row 7). ci
- If the development has any existing uses, calculate the AM Peak and PM Peak trip generations using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 8-13). Attach additional sheets as necessary for more uses.
- Sum up all of the trips generated for the existing uses in the Total Existing Trips row (row 14). 4.
- Subtract the total existing trips from the total new trips to get the final total number of trips generated by the development (row 15). Enter these numbers on the first page. Š
