* R-6 and R-7 developments require at least two types of residential housing types (i.e. lot size variations and configurations, single-family attached, etc.) and no one housing can exceed 70 percent of the master plan. In R-7, no more than 30 percent of the total dwellings may be multi-family units.

^ MX-U requires a specific mix of uses; residential uses shall make up no less than 50 percent nor more than 80 percent of the uses within the master plan.

NOTE: All setbacks are minimum standards and there are zero setbacks for all shared party walls.

* Where a lot of record is less than 60 feet in width as measured at the front setback line, side yard setback lines may be reduced to 5 feet.

^ Each townhouse group of more than four attached units shall have a minimum side yard setback of 15 feet for each end unit.

Setback depends upon the number of stories (1- and 2-story dwellings require 7-ft. setbacks and 3-story dwellings require 10-ft setbacks). Additionally, by special use permit, side yard setbacks may be reduced up to 0 feet if sprinkler systems are installed or walls with 1-hr. fire resistance rating are constructed.

NOTE: Although there are no minimum dimensional requirements for parcels, all new parcels must have public street frontage. Also, all lot widths are measured at the required setback line.

* SUPs may be approved to allow structures taller than 75 feet.

^ Wireless Telecommunications Facilities towers are permitted to reach 125 feet by right but may exceed 125 feet by SUP.

NOTE: All setbacks are minimum standards and there are zero setbacks for all shared party walls.

* Side and rear yard setbacks increase to 30 feet when a side or rear property line is shared with a residential district and an additional foot of setback is applied for each foot that a structure is above 35 feet height.
