Section 5. Variances No variances requested (continue to section 6) Variance requested. If variance is requested, please provide the following information: I (we) hereby apply for a variance from Section(s) 10-2-42(C) & 10-2-43 of the City of Harrisonburg Subdivision Ordinance and or Section(s) of the City of Harrisonburg Design and Construction Standards Manual, which require(s): Frontage. All lots shall front on a public street and no lot shall embrace any portion of a street or alley. A 10-ft wide utility easement shall be provided along front lot lines or any lot line adjacent to public right-of-way, and easements of at least 10-ft wide, centered on the side or rear lot lines for utilities and drianage. I (we) believe a variance should be granted based on the following "unnecessary hardship" which is peculiar to the property in question. (See Section 10-2-2 of the Subdivision Ordinance): The configuration of the properties is such that frontage of the buildings onto Vine Street would severely limit the number of townhouse units. In addition, existing developments adjacent to this property have their buildings facing a private parking unit, as is being proposed for this development. The preliminary plat illustrates, 5-ft and 10-ft public general utility easements are provided to serve each new lot. This variance is requested so that additional easements that would otherwise restrict use or conflict with other easements (i.e. public water, public sanitary sewer, and BMP maintenance areas) are not required along the frontage and side or rear lot lines for each newly created lot. Section 6. Certification The City of Harrisonburg's preliminary plat and subdivision requirements are in the code of the City of Harrisonburg, Subdivision Ordinance Sections 10-2-1 through 10-2-86. Please read these requirements carefully. I have read the ordinance requirements. I also certify that the information supplied on this application and on the attachments provided (m and other information) is accurate and true to t

Thanh Dang, Assistant Director Harrisonburg Planning & Zoning 409 South Main Street Harrisonburg, VA 22801

Subject: Rezoning Request - Revised

Ms. Dang

This letter accompanies Rezoning, Special Use applications and Pre-Plat drawings for parcels 42-D-21 and 42-D-22 at 137 and 107 Vine Street. Our client wishes to develop these parcels, constructing 29 townhouse units. The existing property line between the two existing parcels shall be vacated.

The current zoning is B-2C, which does not allow by-right development of townhouses. This request is to rezone the unified parcel as R-8 – Small Lot Residential.

The Special Use Permit is required for constructing townhouses of not more than eight (8) units in R-8.

The Pre-Plat is being submitted to assist in expediting the planning/approval process.

Cordially,

Edmond H. Blackwell, P.E.

Civil Engineer

VA PE License #0402023831

PROFFER STATEMENT

Owner: James Strawderman Trust Estate

Date: April 1, 2021

Rezoning Case Number: TBD

Tax Map Numbers: 42-D-21 & 42-D-22

James Strawderman Trust Estate hereby proffers that the use and development of this property shall be in strict accordance with the following condition:

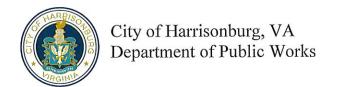

1. When constructed, there shall be only one entrance onto Vine Street.

StrawderMAN

"I hereby proffer that the use and development of this property shall be in strict accordance with the proffered condition set forth herein and/or depicted thereon."

Butch Strawderman

On behalf of James K. Strawderman Estate

Determination of Need for a Traffic Impact Analysis (TIA)

www.harrisonburgva.gov/traffic-impact-analysis

For inclusion in an application for Planning Commission review (for Special Use Permit, Rezoning or Preliminary Plat), this form must be submitted to the Public Works Department at least 5 business days prior to the Planning Commission application deadline.

Instructions

Determination of trip generation rates shall be in conformance with ITE guidelines.

- 1. Based on the intended use(s), calculate the AM Peak and PM Peak trip generation using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 1-6). Attach additional sheets as necessary for more uses.
- 2. Sum up all of the trips generated for the new uses in the Total New Trips row (row 7).
- 3. If the development has any existing uses, calculate the AM Peak and PM Peak trip generations using the AM and PM Peak Hour of Adjacent Street Traffic rates from the most current version of the ITE Trip Generation Manual (rows 8-13). Attach additional sheets as necessary for more uses.
- 4. Sum up all of the trips generated for the existing uses in the Total Existing Trips row (row 14).
- 5. Subtract the total existing trips from the total new trips to get the final total number of trips generated by the development (row 15). Enter these numbers on the first page.

Revised Date: December 2019
