

Update on Current City of Harrisonburg

Environmental Initiatives

General Education and Outreach- Past Calendar Year

Group	Topic	Date

**Note the above table is only for events. Educational messages on social media, newsletters, in the media, or in other formats are not included.*

Grant Updates

Grant	Project Description	Status/Update
EECBG Formula Grant	Install 35kW of solar on Turner Pavilion	The City has completed the project and is working through the close out process.
Transportation/Bike-Ped Grants	More information about funded transportation related projects can be found at: https://www.harrisonburgva.gov/transportation-projects	

Focus Area 1: Buildings and Energy

Greenhouse Gas Emissions Inventory- Community & Municipal

The emissions inventory describes energy use of different areas of municipal operations, including, but not limited to: fleet vehicles, buildings, and street lighting. The emissions inventory also describes energy use of different areas and operations within the community.

The GHG Emissions Reports are available at: <https://www.harrisonburgva.gov/EAP>.

Current Status: 2024 inventory in progress

Alignment: FA1 Goal 2

Staff Contact: Keith Thomas

Solar on City Facilities

Building	Solar System Size (kW)	Year Installed	Percentage of the Total Building Load (%)
Bluestone Elementary	340	2023	90
HCPS Central Office	35.1	2023	20
New PW Building	91	2024	66
Fire Station 5	83	2025	TBD
Turner Pavilion	35.2	2026	TBD
The Navigation Center	TBD	TBD	TBD
Total kW Solar:	584.3		

In addition, Friendly City Solar provides 1.755 MW DC (1.5 MW AC) solar to the City's grid.

Current Status: Ongoing

Alignment: FA1 Goal 1, 3, 4 & 6

Staff Contact: Keith Thomas

SolSmart

The City has completed requirements needed for silver designation. City staff created a solar landing page:

<https://www.harrisonburgva.gov/solar-resources>. More information about SolSmart is available at:

<https://solsmart.org/>.

Bronze	60 Total Points	3 Prerequisite Criteria
	☐ 20 Points in Permitting & Inspection ☐ 20 Points in Planning & Zoning ☐ 20 Points from any other category	☐ Solar Statement (PR-1) ☐ Solar permitting checklist (PI-1) ☐ Zoning review (PZ-1)
Silver	100 Total Points	4 Prerequisite Criteria
	☐ Complete bronze designation requirements	☐ Permit staff training (PI-2) ☐ Inspection staff training (PI-3) ☐ Zoning clarification (PZ-4) ☐ Solar landing page (CE-1)
Gold	200 Total Points	3 Prerequisite Criteria
	☐ Complete silver designation requirements	☐ Permit turnaround time (PI-4) ☐ Zoning accessory use (PZ-5) ☐ Zoning barrier removal (PZ-6)
Platinum	350 Total Points	4 Prerequisite Criteria
	☐ Complete gold designation requirements	☐ Instant permitting (PI-5) ☐ Post metrics (PI-6) ☐ Install solar (GO-1) ☐ Community partnerships (CE-2)

Read about the SolSmart designation press release here: https://harrisonburgva.gov/sites/default/files/CMO/files/press_release/2024/01-17%20Harrisonburgs%20Hard%20Work%20Earns%20SolSmart%20Silver%20Designation.pdf

Current Status: Silver Designation

Alignment: Guiding Goal 2, FA1 Goal 6

Staff Contact: Keith Thomas, Thanh Dang

Solarize Campaign

The City partnered with LEAP to promote their Solarize Campaign. The 2025 campaign is expected to kicked off April 15. More information about Solarize Virginia is available at: <https://solarizeva.org/>.

Year	Area	Total Signups	Total Executed Contracts
2022	Harrisonburg	29	4
2023	Harrisonburg	13	0
2024	Harrisonburg	6	1
2025	Harrisonburg	8	1

Current Status: Complete

Alignment: Guiding Goal 2& 3, FA1 Goal 6

Staff Contact: Keith Thomas

Focus Area 2: Land Use and Green Space

Expanding & Protecting Tree Canopy

Staff applied for and received funding from the [Urban and Community Forestry Grant Program](#) to create an urban forest management plan. Staff have worked with our consultants, Urban Canopy Works LLC, to develop and finalize the plan. An urban forestry management plan is essential to the City of Harrisonburg because it helps guide city staff to care for and manage single trees and tree populations in urban settings for the purpose of improving the urban environment. Urban forestry involves both planning and management, including the programming of care and maintenance operations of the urban forest. Urban forestry advocates the role of trees as a critical part of the urban infrastructure including stormwater mitigation. Urban foresters plant and maintain trees, support appropriate tree and forest preservation, conduct research and promote the many benefits trees provide. The final report is planned to be presented to City Council in late November or December.

Citizen Tree Plantings: The City provides opportunities for citizens to plant trees through our Harrisonburg Conservation Assistance Program (HCAP) (<https://www.harrisonburgva.gov/hcap>). Staff previously worked with the program managers for the Anne Arundel County Community Tree Planting Grant Program to understand ways in which we could improve our program design based on lessons learned from the Maryland program. Advantages of our HCAP program is that citizens get the value of a certified arborist to evaluate the site and make recommendations on where to plant and what to plant. This helps ensure that the right tree for the right place principle is followed and does not place the burden on a landowner to design their own planting plan.

Public Trees Planted	
Trees planted this year (CYTD)	1065

Current Status: Ongoing

Alignment: FA2 Goal 1, FA2 Goal 2, FA2 Goal 3, FA2 Goal 4, FA6 Goal 4

Staff Contact: Jeremy Harold, Keith Thomas

Pollinator Habitat

Staff work to convert traditional landscaped areas and turfgrass into pollinator habitat spaces. Many of these spaces have been in road medians. View our interactive webmap: <https://arcg.is/0HuTS1>

Read this article about the City of Harrisonburg's Pollinator Program: <https://www.nrpa.org/blog/the-buzz-in-the-burg/>

NRPA published a new resource for other professionals which features our program on page 21 and a case study on page 30. For more information visit: <https://www.nrpa.org/blog/create-more-sustainable-parks-through-pollinator-and-native-habitat/>

Current Status: Ongoing

Alignment: FA2 Goal 1; FA2 Goal 4

Staff Contact: Jeremy Harold, Keith Thomas

Zoning and Subdivision Ordinances Update Project

The Zoning and Subdivision Ordinances regulate how land is used and is developed.

Topics that the Zoning Ordinance could address that may be of interest to the EPSAC include, but are not limited to: regulations that promote higher density, compact, and mixed use development; regulations that allow community gardens as a principal use; regulations that allow beekeeping as an accessory use; regulations effecting the location and design of solar installations; regulations that require landscaping and trees; regulations that encourage tree preservation

during development; and regulations that require less off-street parking or that establish a maximum number of parking spaces. More information is available at: <https://www.harrisonburgva.gov/zoning-subdivision-ordinances-update>.

Current Status: The project is anticipated to continue and will include opportunities for public engagement and input.
Alignment: FA 2 Goal 1; FA 4 Goal 5; FA 4 Goal 6; (could also support) FA 1 Goal 6; FA 2 Goal 3; FA 3 Goal 1
Staff Contact: Thanh Dang

Continued Expansion of Sidewalks, Shared Use Paths, and Trail Facilities

Refer to: Alternative Transportation Infrastructure (Shared Use Paths, Safe Routes to School, etc.) under Focus Area 4.

Focus Area 3: Regional Food Systems

There are no updates. Staff shared Staunton’s community garden ordinance with Community Development for consideration in their zoning update work.

Focus Area 4: Sustainable Transportation

Alternative Transportation Infrastructure (SUPs, Safe Routes to Schools)

Staff continue to expand infrastructure for alternative transportation methods such as biking or walking. These include building shared use paths, bike lanes, protected bike lanes, road reconfigurations, sidewalk, pedestrian crossing features, etc. The goal is to create more accessible, safe, and convenient methods of traveling throughout the city with alternative methods of transportation. More information: <https://www.harrisonburgva.gov/transportation-projects>

Current status: Complete
Alignment: FA4 Goal 5
Staff Contact: Jakob zumFelde

Fleet E-Bikes

PW purchased two e-bikes. These bikes are used in lieu of fleet vehicles for staff to get to meetings, site visits, and other city business around town. The following miles chart represents the total miles ridden on the bikes. While the mileage on a bike is not exactly correlated to the miles that would have been driven on the road, the miles do represent general usage and a reduction in vehicle mileage. Furthermore, fleet e-bike use represents our commitment to bike-ped infrastructure and multimodal transportation.

Total Miles	
Bike	Miles
Red Como*	1,107
Black Globe Haul	595
Total	1,702

**exact mileage prior to PW use is unknown. It is estimated between 30-50 miles were on the bike prior to PW purchasing the bike in June 2023.*

Current status: Ongoing
Alignment: FA4 Goal4
Staff Contact: Keith Thomas

Fleet EVs

Vehicle	#
Chevy Bolt EUV	2
Ford F-150 Lightening	3
International CE Series EV school buses	5
Total	10

**PW planned to order 3 additional F-150 Lightenings in FY26, but Ford has ceased production. Will be getting F-150 hybrids.*

Focus Area 5: Waste Reduction and Recycling

Eateries Acting Towards Sustainability (EATS)

Certification program designed as a voluntary initiative for proprietors within the food service sector to opt into. The objective of this certification is to recognize the dedication and efforts of these establishments. The aim is for the Eateries Acting Towards Sustainability (EATS) program to serve as a valuable tool in steering sustainability efforts within food service operations, potentially igniting further environmentally friendly business endeavors.

Furthermore, the EATS Program aims to prioritize waste reduction and position the Harrisonburg restaurant industry and broader hospitality sector as pioneers in sustainable practices and environmental stewardship. By fostering a culture of practical sustainability, this initiative not only benefits the environment but also enhances the overall quality of life for all residents in Harrisonburg. Through public education on minimizing single-use waste and empowering restaurants to adopt cost-effective waste reduction measures, this program will tackle waste-related challenges.

This certification program has three levels to highlight everyone's level of sustainability. The first level, called the Sprout Level, is a very low-barrier entry to reward people for making the small but necessary steps towards sustainability. The second level, Bloom, pushes businesses to take an even bigger step to reduce their single-use plastic. The final level, Harvest, will show how businesses are putting sustainability at the forefront of their everyday operation. At the Harvest Level, businesses will hopefully be able to start reaping the rewards of their hard work and will be able to share their experience with others. The points system is based on categories that align with the six focus areas of The City of Harrisonburg's Environmental Action Plan. More information about the program is available at:

<https://www.harrisonburgva.gov/EATS>.

Certified Establishments		
Establishment	Level	Year Certified
Drifters Cafe	3- Harvest	2024
Grilled Cheese Mania	3- Harvest	2024
Bowl of Good	3- Harvest	2024
Friendly City Co-op Food Bar	3- Harvest	2024
Black Sheep Coffee	3- Harvest	2025
Aristocat Cafe	3- Harvest	2025

Recycling

Year to Date	
January- June 2026	
Item	tons
Plastic #1	4.6
Plastic #2	2.9
Mixed Paper	10.1
Cardboard	99.0
Plastic Bags	4.0
Aluminum	1.5
Tin/Scrap	10.9
Glass	32.6
Total Recycled	165.4
Total MSW	4290.3

Alignment: FA 5 Goal 1; FA 5 Goal 2; FA 5 Goal 3

Staff Contact: Harsit Patel

(Note for Keith: Spreadsheet: [Located here](#))

Urban Wood Program

The Urban Wood Program seeks to reuse trees that must be removed because of insect, pest, disease, or weather damage. The goal is to keep this material out of landfills by repurposing the material and offsetting the need to harvest new material. Between 2020 and 2022, the program has kept an estimated 46 tons of wood out of our landfill through public auction of logs and firewood. Additionally, another 5-10 tons of woody debris was used as woodchips around pollinator habitat and newly planted trees throughout the City. For their hard work and innovation, staff were awarded the Gold Medal for the Governor's Environmental Excellence Award for the Urban Forestry and Urban Wood programs. More information can be found in this press release: [04-05 Public Works Honored with Gold Medal for Urban Forestry and Wood Program.pdf \(harrisonburgva.gov\)](#).

Current status: Ongoing

Composting at City Hall

Composting City Hall			
	YTD Total	Average	Max- All Time
Item	tons	tons	tons
January	5.52	3.26	5.52
February	4.78	3.10	4.78
March	4.87	3.12	4.87
April	6.09	3.23	6.09
May	4.50	3.33	5.28
June	4.06	3.01	4.29
July		3.24	5.27
August		3.22	4.85
September		3.29	4.72
October		3.69	5.93
November		3.66	4.66
December		3.34	4.92
2026 Total	15.17	3.01	57

The following annual tons and GHG charts will be calculated at the end of every calendar year.

Staff also encourage at home composting in social media posts and flyers.

Current status: Ongoing

Alignment: FA 5 Goal 1; FA 5 Goal 2

Staff Contact: Shayna Carter, Harsit Patel, Keith Thomas

(Note for Keith: Spreadsheet: [Located here](#))

Household Hazardous Waste Collection Events

Staff work with the Rockingham County Landfill to offer two household hazardous waste collection days in April and October. More information: <https://www.harrisonburgva.gov/hazardous-waste-collection>

Alignment: FA 5 Goal 1; FA 5 Goal 2; FA 5 Goal 4

Staff Contact: Shayna Carter, Harsit Patel, Keith Thomas

Focus Area 6: Water Resources

Stream Restoration Work

Work started on the Mountain View Drive stream restoration project and is completed. In addition, work on the Blacks Run South stream restoration is about 70 percent completed and will continue through this year. Stream restorations are part of the suite of BMPs the City is constructing to help reduce erosion, filter pollutants, and improve water quality. Additionally, some stream restoration projects are designed to protect infrastructure.

Stream Segment	Length Restored (lin ft)	Year Complete
Purcell Park	Approx. 2000	2009
Northend Greenway	3,137	January 2021
Mountain View Drive	1,650	February 2024
Blacks Run South	5,500	April 2025
Total:	12,287 (2.33 miles)	

Current status: Ongoing

Alignment: FA 6 Goal 4

Staff Contact: Tom Hartman, Keith Thomas

Harrisonburg Conservation Assistance Program (HCAP)

HCAP provides funding for private landowners to voluntarily install best management practices (BMPs) on their property to help treat or reduce runoff from their property.

FY Year	Approved Projects	Completed Projects	Cancelled Projects	Carryover Projects	Total Project Payment
2020	5	3	2	0	\$23,918.07
2021	3	3	0	0	\$38,503.71
2022	3	1	2	0	\$352.10
2023	8	7	0	1	\$7,492.69
2024	25	17	0	8	\$21,204.18
2025	27	16	3	8	\$56,953.59
2026	21	14	4	11	\$24,424.57
2027 (YTD)	TBD	TBD	TBD	TBD	TBD

Septic to Sanitary Reimbursements

Year	Completed Connections
2006 - 2016	28
2017-2025	32
2026 (YTD)	1

Septic systems tend to leach bacteria and nutrients into waterways which contributes to water pollution. Connecting to sanitary sewer diverts these pollutants from the ground to the sanitary sewer systems which is treated at the waste treatment plant and improves local water quality.

Alignment: FA 6 Goal 4

Staff Contact: Keith Thomas
